

Board Policy 423: Artificial Intelligence

Personnel

Iowa Valley Community College District recognizes the transformative potential of Artificial Intelligence (AI) as a tool for enhancing learning, creativity, and productivity. The District is committed to the ethical, effective, and secure use of AI technologies by all members of the college community, including students, faculty, and staff. Faculty are encouraged to incorporate the use of AI's capabilities, limitations, and ethical implications into the curriculum where appropriate. AI tools intended for use with District systems or sensitive data, such as student records, employee information, or other confidential college data, must undergo an institutional review to ensure compliance with District security and privacy standards.
